

## High Speed Credit / Debit Card Module

Is your credit card  
processing slowing  
you down?

- Does your business have high volume sales periods? Do you have big line-ups? Are extra staff required to handle cash transactions during peak periods?
- Annoyed with fixing tender errors?
- Tired of reconciling at day's end?
- Terminal and telephone line charges adding up?

### How Profittek CCA Works

Profittek's CCA software is an add-on application designed to provide integrated processing of credit and debit cards for both Profittek's Retail and Hospitality products. Customer "Bank Terminals" are replaced by a system that reads the credit card through a magnetic stripe reader attached to the computer terminal or built in to the debit PIN pad (Canada only). When the tender screen in the POS pops up, a single swipe of the credit card is all that is required. At day's end, once management has verified the totals, the POS system automatically posts the transactions to the bank as part of the daily close routine. Profittek connects to the processor using a regular dial-up line, or a high speed data (Data Pac) line or the internet via a secure SSL or VPN connection.

## High Speed Credit / Debit Card Module

### Canada & US

Profittek is currently certified in Canada with:

- Moneris for dial-up and High Speed Internet credit and debit.
- Global Payments Canada for IP based credit and debit using Radiant Systems Retail Connect VPN.

Profittek is currently certified in the USA for major credit cards (ask about debit) with PC Charge Payment Server interface, which allows a variety of US based processors to be used in both dial-up and internet modes. Profittek is certified for VISA, MC, Diners, JCB and AMEX\*

### Profittek CCA Benefits

- Speed: Cut transaction time at the point of sale in half. Transactions take from 2 to 6 seconds versus 20 to 25 seconds. Reduce line-ups.
- Productivity: More throughput means higher productivity. either through reduced staff requirements or more sales.
- Accuracy: No more tender errors to reconcile. Transactions automatically posted as part of day end procedures.
- Savings: For larger sites, a reduction in terminal rental and telephone line charges more than offsets the cost of the VPN/Internet or Data Pac service.
- Information: Valuable and detailed reporting on all transaction activity is available for cross checking the bank's totals.

### Profittek CCA Features

- Automatic recognition of card type.
- Automatic prompt for "call in" if the processor circuit is down.
- Automatic prompts to complete pending or voice authorized transactions at daily close.
- Automatic reversal on re-opening bill for adjustments and voids.
- Pre-authorization and completion for tips.
- Automatic prompt for tip for Canadian debit.
- Real time look-up of batch and intermediate totals and transaction details.
- CCA reporting by card type with variance.
- Options for number of CCA slips, customer and/or server name on slip.
